## Dear ma'am

I'm student of Nutrition and Food Engineering at Daffodil International University. It is great enthusiasm that I apply for the position of intern. I have very strong academical background combined with experiences. I believe that I could make a significant and valuable contribution by internship.

I attached a copy of my resume, contains the details about my educational background and extra curriculum activities. I hope that you will consider me for **dietetics internship**.

Sincerely,  
Ismath Jahan
